Government, Internal Process for decisions making

Note: This is a modelling, done based upon analysis of existing facts and evolving reasoning, as to how the 'Government' and 'Constituents of Governance' are likely to behave and function 'influenced by normal human attributes' under different 'probable conditions' and does not imply projection or criticism of 'any particular government system in the world'. Any explanation in this 'coinciding with any working Government system' shall be an unintentional coincidence only.

Internal processing	NonDAVM=(-)150 ; DAVM=100
The noting are based upon DAVM-analysis elaborating success/failure of previous similar decision/ situation (NOT just reference of previous situation)	DAVM Analysis=100 ; No=(-)150
Does the notings become bigger as the authority becomes higher.	Yes=100 ; No=(-)150
Does the noting becomes smaller as the authority becomes higher	Yes=(-)100 ;
Is the top authority responsible & accountable for decisions or lower one. Who is responsible for wrong decision?	top two levels=150 : Lower=(-)100
Are the results aimed at are defined in DAVM terms	Yes=150; No=(-)150
Has a decision which has not produced notified DAVM results is classified as 'Wrong decision' and the decision which has produced the notified DAVM results classified as 'right decision'	Yes=150; No=(-)200
