

Note: This is a modelling, done based upon analysis of existing facts and evolving reasoning, as to how the 'Government' and 'Constituents of Governance' are likely to behave and function 'influenced by normal human attributes' under different 'probable conditions' and does not imply projection or criticism of 'any particular government system in the world'. Any explanation in this 'coinciding with any working Government system' shall be an unintentional coincidence only.

## Foundations of Master Slave Governance

**Summary:** This chapter would help to understand that:

1. There are two different and opposite behaviors of a government, to be a 'Master'(making the citizen slave) or 'serving the citizen'/'citizen service'
2. The most ignored activity by a Government viz. 'Direct and Effective direct communication between Government and Citizen' is significant factor to transform the government into a 'Master' or 'Serving citizen'.
3. Citizen Low-CEAK/NAAK, Madiak/Madism, Political party based government, Low elections index plays significant role for onset of Master Slave (MS) Governance
4. Existence of, 'political party and political people' have strong incentive to 'break' the direct and effective communication, thus transforms government into a 'Master'
5. The behavior of MGG group in Government 'decides primarily' if the Government would be 'Master slave' or 'serving citizen'/'citizen service oriented
- 6.

A country is a large group of millions of people and with enormous land resources. Land is made to house the people and to provide them the livelihood through its resources. The dependence of people on the nation's resources creates a situation where the whole lot of people gets fragmented for the choice of resources as per their needs and if the resources are less than the people's need, they would develop inclination to grab the resources.

If the resources are enough for the people, then the tendency to grab individually is not prominent however, the deficiency of resources for each individual makes it a prominent behaviour. But their ability to hold over resources is decided by the other body viz. 'Government'.

**The most important amongst 'nation's resources' is the 'Government/Nation's treasure and Government assets' and would include mines, ores, earth, petroleum, water, forests, river and products etc.**

### Government prerequisites:

To streamline the use of nations resources for the overall development of people and nation, with a discipline of optimization of use, minimizing wastage, keeping harmony amongst various fragmented groups of people and planning to keep a balance between the resources and the people to keep citizen unrest factor low, a separate group of people is needed which should have influence and control over the masses of people and **an higher level of thinking/intelligence, vision and foreseeability** (refer to government intelligence model and decision making profile model) to optimize balance between the two.

However, the most important is that the Government people qualify to:

- i. they have trust of the people
- ii. they have much higher level of thinking thus intelligence, enabling them to 'plan and visualize'
- iii. they are honest, just, transparent and impartial
- iv. they do not attach themselves to nation's resources for own benefits
- v. represent to the people/ citizen as the most genuine caretaker of nation's resources and maintain the balance between citizen's size and availability of resources
- vi. Their decisions are 'uniform and impartial'.

These criteria therefore, are **the prerequisites for a government for 'general management' and are essential for people of the nation to go with their decisions with government's gesture of utmost transparency, responsibility and accountability**, and these two work in harmony.

So the Government would provide surveillance over nation's resources from citizen side. Let we call Government people group in this mode as **Selfless guardians of Nation's resources SGNR** for people of the nation. 'Since surveillance provides authority also, which can be misused, the punishment should be more aggressive and stringent for Government people for malfeasance, misuse and misappropriation for their own benefits.

In order to both these constituents work in harmony, similar prerequisites for the citizen/people group would be:

- (i) they have uniform thinking and opinion
- (ii) they use the resources judicially and do not encroach over other's
- (iii) keep vigil on Government actions

## Government and Citizen Harmony

### SGNR- GPP and Citizen:

The most important point for true performance of this system is the belief of the people of the Nation (PON)-citizen and behavior of the government people that **the Government people' are 'nation's representative in selfless form' and not another citizen mastering over them.** It is very important to note that SGNR is the origin of this belief and therefore, **the behavior of Government people (GPP) would enable the citizen to have such belief, if GPP are SGNR?** Ideally these two groups, citizen and GPP, if in perfect harmony can manage well. In kingdoms, the SGNR represented by one man. And in other democratic systems the Government has people, thus termed as 'Members of Government-MOG'. The head of MOG group shall be HOG-Head of Government.

This is a large group consisting of 'HOG/MOG' and field management/administration who are termed as 'Managers of Government's governance (MGG).

It need to be understood that 'Nation' has two constitutes 'Citizen' and 'physical formation'. And 'Citizen' are the 'living & active' constituents at par with GPP and MGG'. **Thus the citizen would have the right to decide if GPP are in SGNR state or not.**

### Government=GPP+MGG:

The Government systems have been working for many many years in this world. These have evolved after experiencing the working of Governments over centuries. The nation therefore, has two major groups, Government and Citizen. However, Citizen group is much larger and scattered over a large land area. The Government is a small group comparatively.

A system has also evolved during this long period that Government consists of people elected from the people of the nation through a procedure normally called 'Election'. They normally emerge from the back ground of a 'political party'. These are HOG, MOG, OIG having accessed into 'government' from the platform of a 'political party'

Thus to interface with the citizen, the Government would need a faction, larger to the Government itself but smaller than the citizen group. **This group would interface with citizen on behalf of the government, thus termed as 'Manager's of Government's Governance MGG'. These are called 'Administrative officers' in many countries. The term 'officer' designate them a special and higher status than citizen as they carry the government powers. Thus they are the 'authorities' to dissipate Government powers direct onto citizen.**

### MGG-Service vs authority:

The Government would consist of primarily the 'politicians designated as Government' and the 'Administrative Officers' MGG governing 'direct management/interface' on citizens on behalf of the 'government'. **Being the part of government the MGG have the 'primary function' of providing selfless services to the people.** The term **MGG-Managers of Government's Governance is conceived to present the 'citizen service orientation'** of the incumbents of this group. However, with emphasis on 'administration' and authority, as it links to 'government authority', the term 'officer' is commonly used representing them as a group exercising 'authority'. And 'authority orientation' elaborates the fact that they are separate and away from the people, contrary to the term 'MGG'. **Thus the term MGG would signify a pro-citizen service mode and 'officer' in 'non-citizen service/authority mode', and let we designate them as MGGAM (MGG in authority mode).** The use of the term 'administrative' also would assign a status signifying them as 'independent' and having provided an authority to control the people the way they want.

The MGG has two faces thus. One is to provide services to the citizen in selfless manner and other one is exercising Government's powers to make them 'super and special'. Both faces are in contrast, opposite and contrary. It is thus very important to evaluate that the MGG are in 'service mode' or 'authority mode'. This has been detailed in other chapter. As **in natural course, any human is**

**selfish, thus MGG can be expected to be in 'authority mode'(MGGAM) if not specifically controlled by 'government's will' to transform the group into 'service mode'. The Government must enforce such laws, rules and procedures to prevent MGG turning to 'authority orientation', i.e. becoming MGGAM.**

### **Government-Citizen direct Communication model: Weak communication forms PL Group**

HOG/MOG, PON and MGG/Officers are three important constituents /actors of 'governance'.

The real situation in many countries presents that the public being a very heterogeneous mass widely varying in nature, economics, interests etc. is often fragmented because of varying level of mutual trust and understanding on these accounts and varying trust levels for one another under different circumstances. These different groups would tend to exercise pressure on the government for their benefits, irrespective of whether other group is equally benefited or less. The government would be dealing with large sections of people, widely varying in their attributes. **The government people have the 'very important' responsibility to maintain a 'real time' true and transparent communication with citizen so that 'the uniformity and impartiality' in their behavior is 'well seen' and 'evidenced of its own'.** Any contravention shall cause 'citizen unrest' and 'disharmony'.

However, if this does not happen or because the communication between government and the people may be scattered, multidirectional and not result oriented due to high heterogeneity of citizen group, the 'consistency' in harmony will dilute. If such a situation would prevail and also if the 'citizen discontentment' is high, it would be the choice of both government (to have PL implanted) and the people PON to pick representatives to represent a particular group and assign the responsibilities for working on behalf of the group as an attempt to fill up the communication gap. The citizen being 'occupied in their livelihoods' and also if the 'Government people' are not 'attending to their problems', mainly due to MGGAM; in authority mode, the citizen would have to have someone to help them. This would result formation of another group, the Public leaders (PL1), representative of these groups, try to influence the decisions being taken for use of nations resources on the benefit of their group. As PL1 individually represents a particular group, this would tend to benefit its group only. This at once exhibits the selfish behavior of PL1. Thus the people group when heterogeneous, unstable with difference in opinions and interests and Government communication with all of them is not 'uniform' and result oriented', upshots creation of another group PL.

**So a PL1, Public leader shall be selfish in behavior and its own strength shall depend upon the strength and unanimity of the corresponding group.**

More heterogeneous the people groups are, more heterogeneous and conflicting the PL1 groups are. So PL1 group becomes third constituents in governance, becoming prominent when the communication between government and citizen lacks.

It is depicted in Fig-GN1 that Government/ MGG/officers group is much smaller and the public group is much larger, thus surrounding MGG group and the channel of communications is within the public group domain between public and the MGG/Government. **This should be direct communication and the nature of communication should be direct, mutual, uniform/continuous, both ways with uniform and homogeneous groups of people and MGG.**

The MGG since providing the government-citizen interface, would be the responsible government unit for effective two directional government-citizen communication. Any deficiency in this shall be the result of deliberate or unintentional shortcomings on part of the MGG. **And deficient communication, if remain unattended, not corrected, not upgraded for a period, the MGG group shall be signified to be in 'authority mode'. Thus 'citizen interface unit' MGG in authority mode and let we term this state as MGGAM.** This would represent the state of 'Managers of Government's Governance' operating as "officers (OFA)" and not 'citizen/public service mode'.

Evidently, as the HOG,MOG,OIG are the citizen representatives and 'form the Government body' and responsible to ensure MGG to be in citizen service mode too, would itself be in 'authority mode' if no action taken by them to correct MGG. **So if MGG are in 'authority mode' and their**

being the direct public/citizen interface, the whole governance system would deem to be in 'authority mode' and 'anti-citizen service mode' and term this as **GAM-Governance in Authority mode**. Thus MGGAM shall signify GAM also.

As now its not only officers MGGAM in the nation's administration at citizen interface, but PL1 group also comes into picture. The governance model may look like Fig.-1

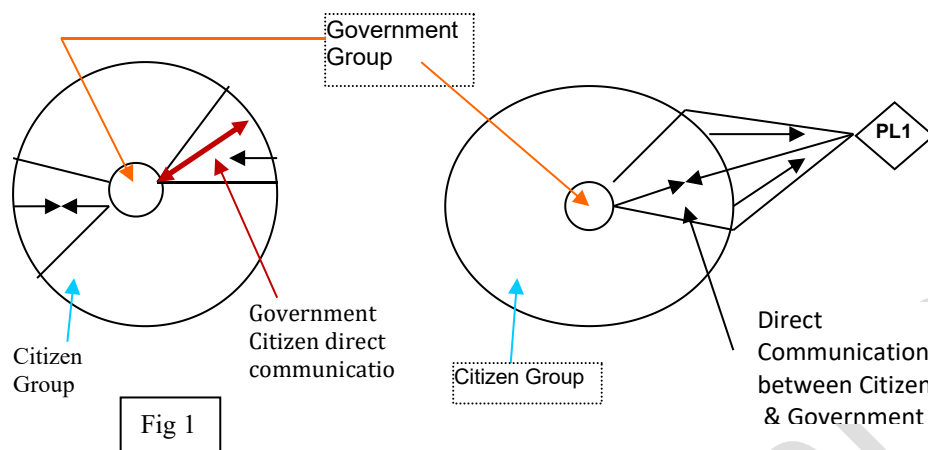

Fig-GN1- Emergence of PL Group

As the communication with the people/ citizen is through the MGG, the 'MGG' shall effectively represent 'Government' in above description.

It is important to note that PL1 is positioned outside the people group as within people's group its identity will get lost and communication with MGG/officers would be through the people resulting it to be distorted and ineffective because of distortions in the people's group. As mentioned above, the MGG would have acquired the form of authority based officers-MGGAM if the direct communication is weak. **PL1, therefore, placed outside the space of people's group but in the same plane for streamlined communication with people.**

However, with fragmented people group, different groups places 'PL1' above their space and the channel of communication becomes between PL1 and MGGAM bypassing the people space. This direct communication between PL and Government/MGGAM bypassing people eventually creates a different plane in the space than the plane of direct communication between people and MGGAM/officers. Since it suits both to Public Leader (PL1) and the MGGAM and both being at positions encompassing powers and empowered to take decisions, this **communication between MGGAM and PL1 would become the most prominent decision channel and the people gradually are bypassed once the PL has been appointed and fully authorized by people to act on behalf of them.**

**There are four very important derivatives from the above discussions:**

1. **Weak or absent direct communication between Government/MGG and citizen results emergence of PL1 group**
2. **PL1 will always desire that a direct communication between Government/ MGG and the citizen does not exists, thus would desire MGGAM; in authority mode**
3. **That PL1 exhibits selfish behavior which is necessary for its existence**
4. **The MGG changes their face from 'citizen service' to MGGAM(authority) mode**
5. **For its survival and existence, PL1 shall wish that the citizen always has problems which eventually would become the reason for continuing communication with MGG and thus the survival of PL1**

Looking from the other side, it can be understood that if PL1 is existing and continuing, there is weak communication between Government and citizen and also the MGG is MGGAM; in authority mode.

A healthy citizen oriented governance would therefore need **(i) people groups to be homogeneous to the extent possible (ii) Government people(MGG) in selfless citizen service orientation (iii)MGG group has direct continuous result oriented communication with people/citizen (iv) a common plane of communication amongst these three constituents (even if PL1 exists) with unified interest of citizen welfare.**

This model now gradually fades away the identity of nation amongst these three. Different opinion may emerge regarding representation of nation in these three constituents but horrified fact may be that neither of these three may now represent 'nation'. Let us understand with elaborations.

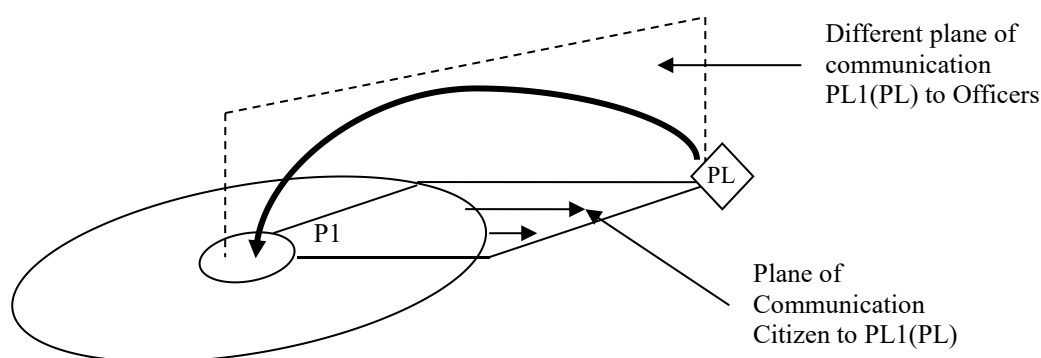

If 'people' is the nation, then there is no need of other two. If PL is the nation then it would use MGGAM/'officers' to their own interest, whereas 'officers' should be dutiful to the people and not to PL. And if 'officers' are the nation, then both public and PL loses existence as they are empowered to take all the decisions. Therefore, it becomes necessary to understand that 'nation' would be defined as an entity sustaining because of the balanced and harmonious efforts of all three constituents.

It is important to understand here that PL1, a public leader, at a lower level direct interfacing with the people/citizen, is one of them at this level. However, many Government systems at government level approve a decision on consensus basis, that majority of government representatives/ members are in support of it. For realizing this activity it becomes necessary that PL1s together forms a group based upon some common goals. These PL1-group would be from different regions, different cultures but joining hands to form a group so that decision making at governments level can be accomplished. **Thus formation of this group consequently would result emergence of political party/parties. And the public leader at this level would become 'Political leader'-PL. A PL1 therefore, would be a 'Political Leader-PL' in subsequent role. Or PL would normally be a person elevated from PL1 group.**

It is also important to note that many Government systems are based upon electing government representatives from the public and **these PL1 or PL becomes the first choice for the citizen to elect and get elevated to the 'Member of Government'.**

#### **STAGE-2 (GN2): MGGAM-PL (PLOF) tie up**

Let PL1A has been placed by P1 group of people and PL1A will have a direct communication with MGG/officers, because if a direct dialogue between people and MGG/officers was in existence, the need of PL1 would not have arisen. PL1A/PL1 is placed outside the P1 group of people because (i) if it is in the 'people group' its authority to communicate with 'MGGAM' will be lost (ii) It would be pulled by each individual people sub-group, to make it questionable, disputed and less powerful. The major change which appears is that PL1 plane of communication with MGGAM is different and would maintain least contact with the people as keeping equal contact with whole citizen group is also cumbersome and painstaking for PL.

Fig—GN2

Also as the link between MGGAM/officers and the people now fades out, people do not know what officers would be doing. PL1/PL also would encourage this link to be missing as this would further consolidate its position and its hold onto people. Even beyond PL1/PL may like to have a state where people would feel MGGAM as their enemy and their action being against them, a state which would emerge lately.

The PL and MGGAM both shall look for Low-CEAK level of Citizen so that they would be helplessly depending upon MGGAM and PL1/PL for support. At this point the MGGAM shall start showing urge for selfish self-gains and would need to be checked here till it becomes irreversible.

#### Emergence of PL-MGGAM business tie-up:

For analyzing working of these constituents in terms of democratic values the following description is helpful:

The initial stage is where the MGGAM/officers and people both feel responsible to nation's resources/interests. The MGGAM would work for the people (Joint custodian of nation's resources) and get the benefits only to the extent of their services rendered to the people. The two way dialogue possible between MGGAM and people and optimal use of nation resource is possible at minimum cost. In this model the PL1/PL is nonexistent for the people and for officers as its existence is associated with people unrest and disharmony only, when in the previous model, the subgroups in PL1 group have different interests.

**This also brings out an interesting analogy that once PL comes to an existence, it would not like and permit harmony and unity in the people group.**

**So PL1/PL interest would be to break the link between the people and MGG/officer.**

Going further, delinked from citizen, gradually the MGGAM/officer would realize being at the place of benefit compared to people as they are close to the nation's resources. If they only do the public service, the benefit of resources goes to public. An inclination of 'self-gains', which would provide an incentive not to do the 'public service' and to distribute benefits to the people.

**A hierarchy of laws and regulations would therefore be envisaged to discourage this. However, as PL-MGGAM would make the laws/rules, most likely those would be kept loose ended to reduce their effectiveness to nab them when they selfishly use nation's resources for their own benefit.**

The most important happening in this course is the direct communication between citizen and MGG/Officer. Let us define this also. A citizen would approach MGG/Officer regarding some issue or help or decision regarding government procedures, norms etc. The citizen's application would go to the data base for processing. The citizen has right to be advised about it. The application of citizen

shall be processed against a time line till decision. The decision shall be communicated by MGG/Officer in standard format. It must be ensured and transpired to citizen that similar decision has been taken in other similar cases. **Thus all laws and rules must be placed on public domain invariably and the government 'data base' regarding grievances must be open and accessible by citizen without any obstruction. The procedures and processing stages defined against time-line should also be accessible and notified as above.**

However, MGGAM would have option not to fulfill the requirements of this essential course of communication. Therefore, this would never be realized if the procedures do not contain action on MGG/Officer affecting their service prospects in case of an ignorance or defiance by them. **Thus the procedures made available to citizen must contain 'action on MGGAM/Officer affecting their service prospects in case of defiance of the rules, norms, time limits and non-uniform and inconsistent decisions in all similar cases.**

By optimal use of the resources, the benefit would go direct to people and the people domain would be larger, stronger and potent than PL domain. This situation would leave PL gradually becoming weaker relatively, a state which would not be welcomed by PL group. They cannot prevent people to use the nation's resources in normal course as, people forms a much- much bigger group. And also the existence of PL group exists only with people group being distorted and weak.

**There is great incentive both for PL and MGGAM/Officer now to slacken citizen-government communication and join hands to selfishly use the nations resources for their benefit. It must be noted that MGGAM would also give inconsistent decisions, different for different people, for the similar cases, and deriving selfish self-gains/benefit for themselves.**

So **PL and MGGAM together (PLOF)**, would introduce criteria to be followed by citizen/people for their entitlement of using nation's resources. These criteria will only be applicable to people but decided by the PLOF group which forms an important deviation from the democratic norms. This may be stated as 'administrative rules or norms'. **They would make the procedures tedious and put a cost also.** The cost will be statutory and underhand as **PLOF bonding would stand only on underhand dealings.** When Officers and PL group would come closer, soon they would realize that they are the custodian of the nation's resources, much closer to it, under the excuse of managing the same, and people are away. If the benefits generating from 'nation's resources' are shared with people directly, it becomes ineffective especially if the 'people group' is larger in numbers. **On the other hand if the benefits are not distributed with people, these provide significant benefits to PL and MGGAM as they are still much less compared to people group.**

**At this stage the MGGAM and PL1/PL would join hands and look for the action plan to accomplish selfish self-gains, benefitting both. The MGGAM would have made up strategies to keep citizen at low-CEAK to have fulfillment of selfish self-gains.**

### **STAGE-3 (GN3): MGGAM-PL-SSCG tie up**

The next stage would emerge from PL and the MGGAM (PLOF) coming further close, in the form of a group with selfish-orientation and 'benefiting self' approach. The **MGGAM/officer would tend to make the procedures complex, less transparent and unmanageable**, so that people can not have access to their dues without coming to the officer. On the other hand those who are stronger in the people group would make officers to manipulate these rules and procedures by paying the '**cost of such manipulation**'. **The rules shall be kept loose and open ended by MGG/Officer to ease out such manipulations. The rules shall also be without comprehensive coverage of 'Responsibility and Accountability' of Each MGGAM for 'citizen service'.** And when this concept consolidates, the PLOF would have people from the citizen group to become a via-media for practicing it. Let we call this group as 'selfish stronger citizen group'(SSCG). These are the people who are in contact with PL and MGGAM and are common to both the planes. They are from PON but aligned to PL and MGGAM/Officers for deriving benefits out of this relation. The democracy provides convenience to officers, PL and selfish citizen' groups to exercise this without getting known to the people, **whereas the PON 'weaker people groups' would just get preaching that what is against the procedures and rules is something they should not do.**

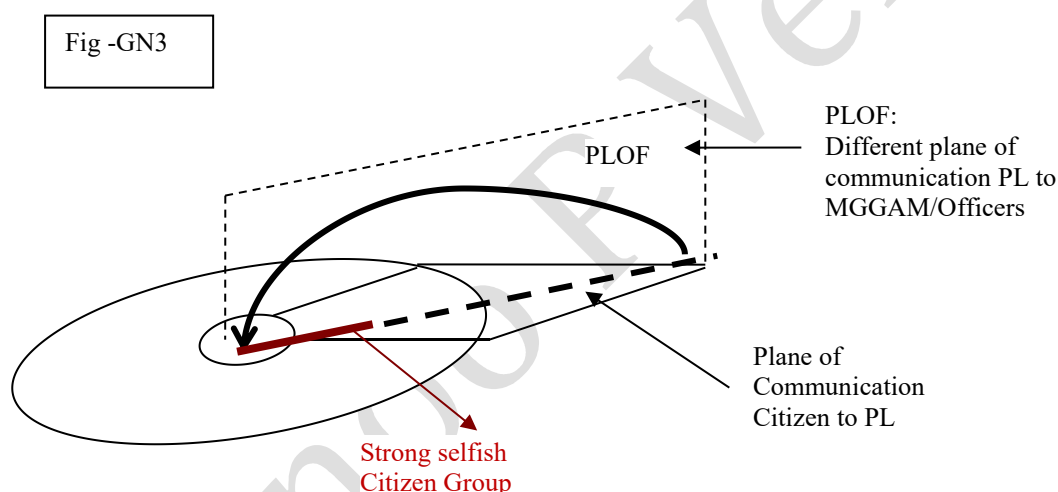

The PLOF would need a medium to convert the nation's resources into 'benefits' in the form they need, therefore the buyers of the nation's resources would become a part of this cycle, although they

may not necessarily have any direct intention to put the PON on disadvantage. The **'selfish and stronger citizen group'** shall be one such via-media, buyer of 'nation's resources' and would include the 'business domain'. This has also been explained in the 'Vicious circle of un-democracy'.

This would move MGGAM away from the people and transform them to 'selfish self-gains' orientation from 'citizen service'. Incidentally, MGGAM would convert to 'authority mode' with this. Consequently the use of resources would get limited to MGGAM, PL and SSCG group alliance and they together would consequently become representative / agent of the nation's resources.

This would result a vicious circle in which the benefits of 'nation's resources' gets cycled to SSCG through PL, MGGAM and is explained in chapter 'Vicious circle of un-democracy'.

We have seen that due to fragmented people's groups, the people places PL/PL1 to represent them to MGG and also that PL/PL1 has a different plane, as depicted in the diagram, of direct dialogue with the officer bypassing the communication plane of the people. This vertical plane has only limited contact with the people and these are the SSCG of the people group. This model prevails when the people in general are poor, illiterate, unaware and these people just become nonexistent and the decision regarding **selling/utilization of resources** gets limited to MGGAM, PL and the SSCG people:

The continuance of this stage would gradually make the citizen group weaker, leaving sight on what PLOF are doing because of struggling with day-to-day problems for their survival.

This state of Nation's management system is most critical as from here the NMS becomes only one way process, the benefit to the PLOF alliance and complete ignorance of people. **When the people gets to such a miserable state that they live fighting for their survival makes them to disassociate from PL and MGGAM/officers as they are no more looking up because of losing every hope of their being in a different state than hunger, helplessness, destitute and accept the state as their destiny.** This is what PLOF would be looking for.

.....The PL would only use the public for their benefits and officers would develop rules to facilitate it to keep people away from the benefits of nation's resources.

**At this stage the MGGAM and PL (PLOF) have worked out strategies and procedures to benefit self, by developing via-media in the form of SSCG & business domain/person to whom they would favour out of way and get the selfish self-gains (MUD Money undue=explained in other chapter) in return.**

#### STAGE4 (GN4):

This becomes the most important turning point in the process of governance and nation's administration/ management. There are now only two groups, PLOF (PL and MGGAM) very powerful and resourceful, having grabbed the rights to control 'nation's resources' for their selfish gains,

directly or indirectly, visibly or invisibly, and the other group 'Citizen/people', pitiful, hungry, fighting for their survival. **The PL group would now include the Government people in the 'top governance tier' OIG/ MOG having associated, as the stage4 would not have reached if the MOG/OIG would have corrected and prevented the formation of MGGAM and PLOF. This situation though may be classified as 'democracy' just becomes identical to 'Autocrat-Monarch' and would result the system, mindset and culture of 'Government as Master' and 'Citizen as Slaves'.**

**And the democratic system coming into this form may be termed as 'Democracy producing Masterism' or 'Anti-citizen democracy'.**

Not getting confused with many players/actors and participants, making the situation easily understandable, there are two groups now viz. **Citizen in the form PITI** (Poor, ignored, troubled, ignorant) people, and **WAAL** (worst alliance of administration and leaders). **WAAL includes MGGAM, PL1, PL, MOG/OIG, SSCG and 'business domain close to PL, MOG/OIG,MGGAM.** In a government model which is quite common over the globe, the 'PL as Government people' is selected by the people as one time activity, for a long period, through a process of 'elections'.

**If the PITI condition prevails in a country, the above condition and the government would be equivalent to WAAL. It is interesting to note here that PL becoming a 'Government functionary/entity', would either behave like a 'master' or a 'service provider' depending upon the rules which can prevent its option to become a 'master'. If this firewall is not strong and effective enough, the WAAL would become even more worst as this has all the constitutional powers not only to keep the citizen at bay but also to protect themselves.**

The WAAL would make all means to believe PITI that they are in that state only because of their destiny. Once they are able to program it in PITI's brain, its an easy course for them to exploit 'nation's resources' for their benefits. **Anything which influences the human brain superstition, religion, threat, fear, fear for future, no-looking up, mental subordination to someone, etc would be WAAL's tools to keep PITI indifferent from what WAAL does.**

The acceptance of this state by people PITI that their destiny being responsible for what they are, makes PLOF/WAAL to be indifferent from them and now move this alliance vertically up in the vertical plane, leaving rest of the people down on the horizontal plane, away and separated without resources, physically close to resources but prevented by rules and regulations by MGGAM and PL alliance. Thus becoming more and more poor.

At the next stage of this process, PLOF/WAAL alliance has moved sufficiently up vertically and away from the horizontal plane of the people.

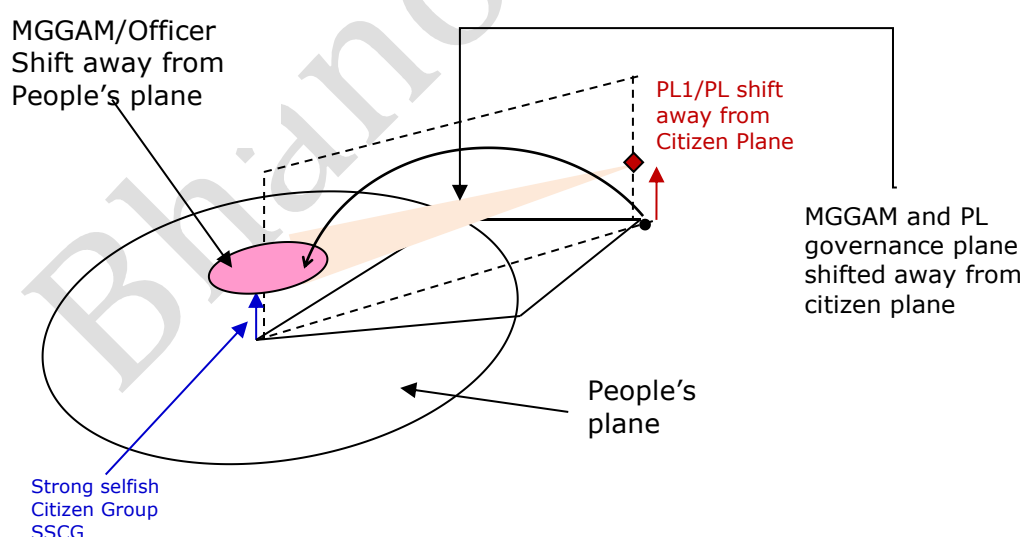

Fig -GN4

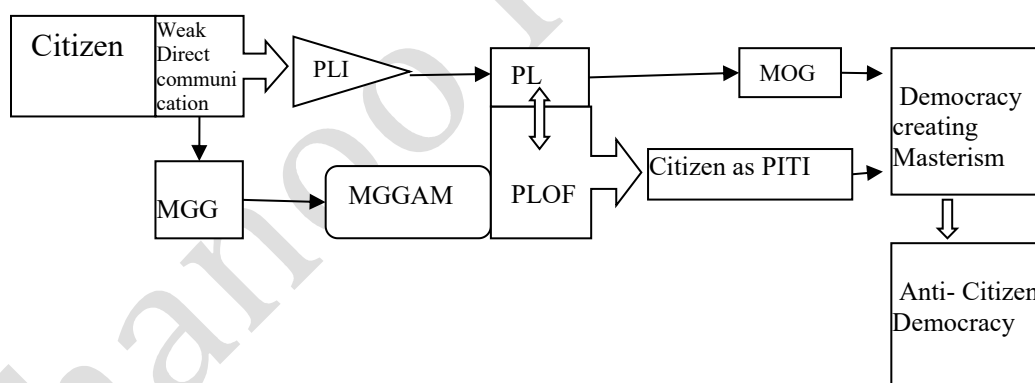

more away from the citizen and would push the citizens away even forcibly. **This lot therefore, gradually would get into an anti-social mindset and for deriving their benefits they would not mind going and becoming more and more anti-citizen. And they would be a part of 'WAAL'. This is an horrified outcome of 'Master-slave democracy' that once getting into the mindset of a 'master', a government becomes closer to 'anti-socials' using them as a tool to terrify PITI to work as 'slave-mindset'.**

### Master Slave Governance firmed up

This model would now be the representation of 'Master Slave Governance' as the master higher from horizontal plane-goes up and up and the people on horizontal plane 'only have option to look up to fall some benefit from the Masters. **At this stage, the Masters only think about themselves and exploit the slaves. They intend to keep slave as slaves as long as it is possible. This may be an unexpected and unbelievable model of democracy but where majority of masses are poor, illiterate, helpless, NAAK this form of democracy automatically gets embodied.** The masters action would be to launch more and more schemes, Ain the name of slaves to see their hopes never die, but also that it does not work for enabling and empowering them. The benefits on the other hand dissipates in PLOF. **The master will sustain relations with PITI by arising sentiments and the approach can be named as 'game of sentiments'.**

**This model does not reflect the form of democracy for which the democracy word has been designed and made. This phenomenon therefore should be named as 'Master's designed democracy' (MADD) as this is a democracy system designed by the Master and 'For the Master' and does not serve any purpose to the 'Slaves'.**

As elaborated in the models developed for various parameters of 'Governance' the various stages likely to correspond to the score/index of various models as below (Low=(NN,N,Z):

Stage1- Low direct communication index +Low IGPI index Low DOUEE responsibility+ Low citizen CEAK+ Madiak in Madism form +Low MGG service vs authority mode

Stage2- From stage1 onwards: Low direct communication index+ Political party system in position and Political party index+ Election political party based and Low Election index+ Political party offices in citizen base for grievance +Political party representatives sorting out public issues with MGG+

Stage3- From stage2 onwards: Low independence index+ Low democracy index +

Stage4- stage 3 onwards: Government sincerity index low+ Government education index low+ Government health services index low+ Low score/ CEJ justice system
